Professional Summary

Computer Programming and Analysis student at Durham College with hands-on experience building full-stack and backend applications in TypeScript, JavaScript, Java, C#, Python, and PHP. Built tested REST APIs with JWT authentication and role-based access control, containerized multi-service systems with Docker, and deployed cloud-hosted applications. AWS Cloud Foundations certified, with a strong foundation in object-oriented design and debugging. Seeking an SDE-I role to build scalable, reliable systems.

Skills

Web Development: HTML, CSS, Typescript, React.js, Node.js, PHP, Bootstrap, React Router, Vite

Languages: Java, Python, C#, TypeScript, JavaScript, PHP, SQL

Databases: MySQL, Microsoft SQL Server, PostgreSQL, MongoDB

Cloud & Deployment: Vercel Serverless Functions, AWS, Docker, Cloudinary

Authentication & Security: JWT, bcryptjs, Google OAuth, role-based access control

Version Control: Git, GitHub, GitLab

Soft Skills: Communication, Teamwork, Accuracy, Problem-Solving, Critical Thinking, Time Management

Project Experience

Interactive Recipe Book V2 - Full-Stack React Application *Jan 2026 - Present*
React 19, Node.js, MongoDB, JWT, Google OAuth, Vercel Serverless, Cloudinary, Bootstrap
Live Demo: https://interactive-recipe-book-v2.vercel.app

- Designed and built a full-stack recipe platform, migrating 50+ recipes from client-side data to a MongoDB backend served through serverless REST APIs
- Implemented authentication using JWT, bcrypt password hashing, and Google Sign-In to secure 10+ API endpoints, with HTTPS and token validation on all requests
- Built live search, category filtering, and pagination that applies filters before paginating, so results stay accurate and queries scale as the data grows
- Deployed to Vercel with serverless functions and packaged the app as a Capacitor Android app, debugging 10+ API connectivity and CORS issues along the way
- Used AI coding assistants to speed up debugging and documentation

Enterprise Web Development - REST API, Authentication & RBAC *Jan 2026 - Apr 2026*
PHP, Node.js, Express, PostgreSQL, JWT, Docker, Docker Compose, PHPUnit

- Designed and built a RESTful mail-management API in PHP with 5 endpoints supporting full CRUD, PostgreSQL integration, prepared statements, and proper HTTP status codes
- Implemented JWT authentication (HS256) and role-based access control for 2 user roles (admin, regular user) across a multi-service Node.js and PHP system containerized with Docker Compose
- Strengthened API reliability and security with request logging, UUID trace IDs for debugging, rate limiting, and centralized error handling
- Wrote automated tests with PHPUnit 10 against PostgreSQL, covering the data-access layer using a TDD approach
- Documented API endpoints and setup steps in README

Super Mario Bros - 2D Platformer (Team Project) *Jan 2026 - Apr 2026*
C#, Unity, Object-Oriented Design, Git

- Built a 2D platformer remake with a team for an Object-Oriented Programming course, applying abstraction, encapsulation, inheritance, and polymorphism to create reusable gameplay systems
- Designed a shared player class hierarchy (Mario, Super Mario) and specialized enemy and collectible classes (Goomba, Koopa Troopa, coins, power-ups) with distinct movement, collision, and state behavior
- Developed centralized game-state management for score, lives, level progression, and restarts, plus a persistent leaderboard
- Collaborated in an Agile team with peer code reviews

Work Experience

FC Associate I, L1 - Amazon Canada Fulfillment Services, ULC *Nov 2024 - Present*
Whitby, ON
- Maintained accuracy and throughput targets while processing high volumes of inventory in a fast-paced fulfillment environment
- Collaborated with team leads and associates to resolve process issues and meet deadlines

Associate - Walmart Canada *May 2026 - Aug 2026*
Whitby, ON
- Delivered accurate customer service in a fast-paced retail environment
- Supported daily store operations

Crew Member - Fresh Burrito *Nov 2024 - Mar 2026*
Oshawa, ON
- Generated invoices and managed inventory records with a strong focus on accuracy
- Delivered customer service in a high-volume setting, balancing speed with precision

Education

Advanced Diploma, Computer Programming and Analysis *Sep 2024 - Apr 2027*
Durham College, Oshawa, ON | Relevant Coursework: Web Development, Database Systems, Programming Fundamentals

Certifications

- AWS Academy Graduate - Cloud Foundations
- Cloud Computing: Store, Deploy & Secure
